Total citations (Scopus): **3,608**

Degree in Civil Engineering (five years courses) cum laude (awards) at the Technical University of Bari (1994); afterwards employed as Concrete young engineering in Calcestruzzi s.p.a - nowadays Italcementi group, Italian leader in concrete production - (1995/1996). PhD in Structural Engineering at the University of Florence (2000). Post-doctoral scholarship in "Civil Engineering Science" at Technical University of Bari in 2001 and Lecturer in structural engineering in the same university in 2001. Visiting assistant professor in Cambridge (2002), associate professor in 2011 at Politecnico di Bari and visiting Professor in Loughborough (2012) and at Hunan University, Changsha, Hunan Province (China) (2014), is research fellow at the SIBERC (Sustainable and Innovative Bridge Engineering Research Center), Fuzhou University, Fuzhou, Fujian Province, China and (2016/2018) full Professor in Structural Design, Faculty of Civil Engineering, Fuzhou University, Fuzhou, Fujian Province, China. From 2018 is full professor in structural Design at Politecnico di Torino, where he is also vice director of the Department of Structural, Environmental and Geotechnical Engineering. His research interests deal with structural optimization, form finding and structural health monitoring. He is author of four European patents and more than 300 papers published in international journals or presented at conferences.

Current Position

Politecnico di Torino (Turin, Italy)

2018 - now

Full Professor in Structural Engineering and Design

Deputy Director of Department of Structural, Environmental and Geotechnical Engineering (DISEG)

Prof. Giuseppe Carlo Marano
